Family/Visitors should not visit if having signs or symptoms of an infection or a communicable disease. Visitation also based on facility’s policy.
Los familiares y visitantes no deben visitar si tienen señales o síntomas de infección o de una enfermedad contagiosa. Las visitas también dependen de la política de la instalación.

Follow instructions below before entering room.
Antes de entrar a la habitación, siga las instrucciones a continuación.

All Healthcare Personnel must:
Todo el personal de atención médica debe:

- Clean hands before entering and when leaving room.
  Lavarse las manos antes de entrar y antes de salir de la habitación.

- Wear a gown when entering room and remove before leaving.
  Usar una bata al entrar y quitársela antes de salir.

- Wear N95 or higher level respirator before entering the room and remove after exiting.
  Usar un respirador N95 o un respirador de nivel superior antes de entrar a la habitación y quitárselo después de salir.

- Protective eyewear (face shield or goggles)
  Protección para los ojos (caraeta o gafas protectoras)

- Wear gloves when entering room and remove before leaving.
  Usar guantes al entrar a la habitación y quitárselos antes de salir.

Preferred placement is in a negative pressure room. When negative pressure room is not available (i.e., LTCFs) place in private room.
La ubicación preferida es una habitación con presión negativa. Si no hay una habitación con presión negativa disponible (es decir, LTCFs), colocar en habitación privada.

Additional PPE may be required per Standard Precautions.
Es posible que se exija utilizar equipo de protección personal adicional según las precauciones estándar.

REVISED DATE: 1/20/2022
Special Airborne Contact Precautions

Remove sign after room is terminally cleaned upon discharge or discontinuation of precautions.

Common conditions (per CDC guidelines)
SARs, COVID-19

Room Placement:
Preferred placement for patients who require Airborne Precautions is in an airborne infection isolation room (AIIR). An AIIR is a single-patient room that is equipped with special air handling and ventilation capacity that meet the Facility Guidelines Institute (FGI) standards for AIIR. In settings where Airborne Precautions cannot be implemented due to limited engineering resources (e.g., physician offices), masking the patient, placing the patient in a private room with the door closed, and providing N95 or higher level respirators or masks if respirators are not available for healthcare personnel will reduce the likelihood of airborne transmission until the patient is either transferred to a facility with an AIIR or returned to the home environment.

In Long-term Care Facilities (e.g., nursing homes, adult care homes, family group homes) place residents in a private room. Keep the door closed UNLESS it poses a resident safety risk (i.e., fall, memory care units).

When private rooms are unavailable, place together in the same room persons who are colonized or infected with the same pathogen.

Personal Protective Equipment:
Put on in this order
• Alcohol based handrub or wash with soap and water if visibly soiled
  • Gown
• Fit tested NIOSH approved respirator (N95) or higher level respirator
  Healthcare worker must be fit tested for respirator and visitors should see nurse for proper use.
  • Put on eye protection (face shield or goggles)
    • Gloves
  Take off and dispose in this order
    • Gloves
  • Eye Protection- Remove goggles or face shield from the back by lifting head band or ear pieces
  • Gown- Unfasten gown ties, taking care that sleeves don’t contact your body when reaching for ties.
    Pull gown away from neck and shoulders, touching inside of gown only.
  • N95 respirator- Do NOT grasp front of the respirator. Grasp bottom elastics then the ones at the top.
    • Alcohol based handrub or wash hands with soap and water if visibly soiled.

Dishes/Utensils:
No special precautions. Should be managed in accordance with routine procedures.

Room Cleaning:
Follow facility policy for Special Airborne Contact Precautions

Trash and Linen Management:
Bag linen and trash in patient/resident room (double bagging of trash or linen is not necessary unless outside of bag visibly contaminated).

Transport:
Essential transport only. Place patient/resident in a medical grade mask. Clean and disinfect transport equipment. Alert receiving department regarding patient/resident isolation precaution status.

Duration of Precautions:
For guidance for duration of precautions, follow Appendix A- Type and Duration of Precautions Recommended for Selected Infections and Conditions within the CDC’s 2007 Guideline for Isolation Precautions: Preventing Transmission of Infectious Agents in Healthcare Settings
