

## **Disclosure to Learners**

### **Activity Approval Statement:**

This nursing continuing professional development activity was approved by North Carolina Nurses Association – Approver, an accredited approver by the American Nurses Credentialing Center’s Commission on Accreditation. ANCC Approver A0141

### **Criteria for awarding contact hours:**

- Learners must attend the entire educational activity
- Learners must complete the evaluation form

### **Evaluation of knowledge gained:**

Learners will be asked to select a presentation where they gained knowledge. Using an open-ended response option, learners will list infection prevention practice(s) that they intend to change as a result of knowledge gained during the activity and state how they will implement that change.

A multiple choice question with 8 choices including the 5 NHSN concepts will be the second question of the course evaluation. Learners will be asked to select the 5 NHSN concepts. Learners will receive immediate feedback on their response. Faculty/staff will assess the percentage of correct responses.

### **Relevant Financial Relationships:**

All individuals in control of content for this activity have disclosed no relevant financial relationships with ineligible companies, with the following exceptions:

David van Duijn is a consultant for Pfizer, Roche, Qpex, Union, and Shionogi; a consultant and grant received from Merck; and a speaker and consultant for Entasis.

William Rutala is a consultant for PDI, Kinnos, and Ideate Medical.

Zachary Willis is a researcher with funding received from Merck, Pfizer, and Novavax.

These relevant financial relationships were mitigated.
