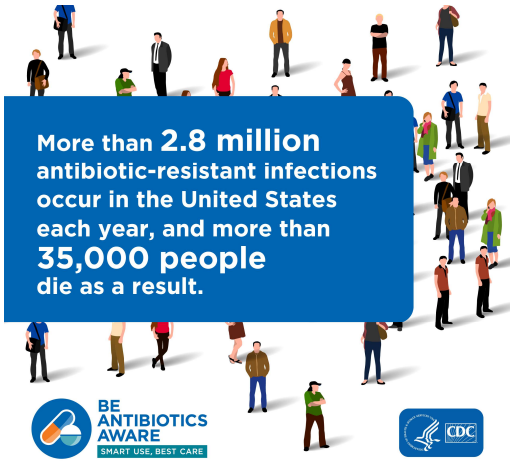
2

What is Stewardship?

Antimicrobial stewardship is the effort to measure and improve how antibiotics are prescribed by clinicians and used by patients.

US Centers for Disease Control and Prevention. https://www.cdc.gov/antibiotic-use/core-elements/index.html#print 3

Why Stewardship?



1.27 million deaths annually attributable to antimicrobial resistance (AMR), and nearly 5 million associated with resistant infections

Top 10 Global Health Threat

World Health Organization (WHO)

AMR Impacts More Than Human Health…

CDCs 2019 AR Threats Report. https://www.cdc.gov/drugresistance/biggest-threats.html

5

Stewardship - Part of a Larger Plan…

2015 WHO Action Plan

- To improve awareness and understanding of AR through effective communication, education and training
- To strengthen the knowledge and evidence base through surveillance and research
- To reduce the incidence of infection through sanitation, hygiene and infection prevention measures
- To optimize the use of antimicrobial medicines in human and animal health
- To develop the economic case for sustainable investment that takes account of the needs of all countries and to increase investment in new medicines, diagnostic tools, vaccines and other interventions

https://www.who.int/publications/i/item/9789241509763

6

U.S. National Efforts – 5 Goals

- Goal 1. Slow the emergence of resistant bacteria and prevent the spread of resistant infections
- Goal 2. Strengthen national One Health surveillance efforts to combat resistance
- Goal 3. Advance development and use of rapid and innovative diagnostic tests for identification and characterization of resistant bacteria

Goal 4. Accelerate basic and applied research and development for new antibiotics, other therapeutics and vaccines

Goal 5. Improve international collaboration and capacities for antibiotic-resistance prevention, surveillance, control and antibiotic research and development

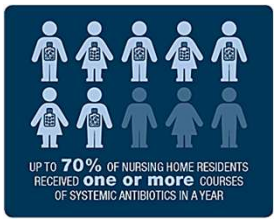
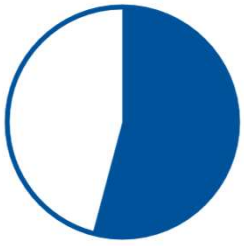
Antibiotic Overuse is Common In Nursing Homes



75% of nursing home residents receive an antibiotic if stay > 6 months



> 50% of antibiotic prescriptions in nursing homes are unnecessary

If needed, the antibiotic prescribed is often too broad in spectrum and/or the course is longer than needed

J Am Med Dir Assoc 2012;13:568 e1-13.
Infect Dis Clin N Am 2017;31:619-38.

U.S. Nursing Home Stewardship Regulatory Timeline

- July 2015- CMS adds stewardship to COP* for nursing homes
- May 2019- Delayed since 11/2017, long term care facility surveys for stewardship begin
- April 2020- Nursing homes required to report COVID-19 data into NHSN

* COP= condition of participation

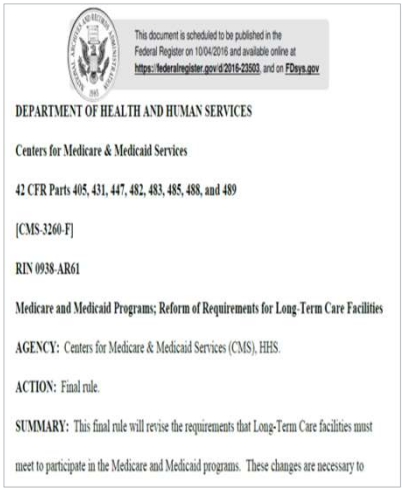
9

Conditions of Participation

What exactly is required?

- have an ASP that includes antibiotic use protocols and a system to monitor antibiotic use

- Needs to be included in the Infection Control program



This document is scheduled to be published in the Federal Register on 10/04/2016 and available online at https://federalregister.gov/d/2016-23503, and on FDsys.gov

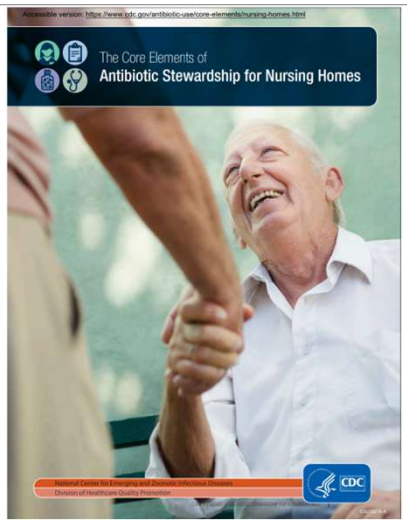
CDC Core Elements- Nursing Homes



Leadership commitment
Demonstrate support and commitment to safe and appropriate antibiotic use in your facility

Accountability
Identify physician, nursing and pharmacy leads responsible for promoting and overseeing antibiotic stewardship activities in your facility

Drug expertise
Establish access to consultant pharmacists or other individuals with experience or training in antibiotic stewardship for your facility

Action
Implement **at least one** policy or practice to improve antibiotic use

Tracking
Monitor **at least one process** measure of antibiotic use and **at least one outcome** from antibiotic use in your facility

Reporting
Provide regular feedback on antibiotic use and resistance to prescribing clinicians, nursing staff and other relevant staff

Education
Provide resources to clinicians, nursing staff, residents and families about antibiotic resistance and opportunities for improving antibiotic use

https://www.cdc.gov/antibiotic-use/core-elements/index.html

Leadership Commitment

Demonstrate support and commitment to safe and appropriate antibiotic use in your facility.

Priority examples (select):

- Write statements of support
- Include stewardship-related duties in job descriptions
- Communicate the priority with nursing and prescribers
- Create a culture through messaging, education and celebrating improvement

https://www.cdc.gov/antibiotic-use/core-elements/pdfs/core-elements-antibiotic-stewardship-H.pdf 13

Leadership Commitment Resources

Our Commitment to Antibiotic Stewardship

Antibiotics save lives, but are frequently prescribed unnecessarily. Harms from antibiotic overuse can be significant, especially for frail older adu adverse drug events, drug interactions, and antibiotic-resist infections.

As part of our continuing commitment to provide the best q are dedicated to improving antibiotic use through antibiotic **Antibiotic stewardship** refers to a set of commitments and a the treatment of infections while reducing the adverse eve use."

We are committed to improving antibiotic prescribing pract resources to support antibiotic stewardship implementatio the support of front-line staff, prescribing clinicians, and n continue to provide residents with the best quality care by protecting them from the unintended harms of inappropria

Sincerely,

To learn more about appropriate antibiotic prescribing and www.cdc.gov/antibiotic-use.

Sample Policy Letter

TO: [Relevant staff]

FROM: [Antimicrobial stewardship program team]

RE: [Name of antimicrobial stewardship program intervention]

DATE: [Date]

Antibiotics are among the most commonly prescribed pharmaceuticals in long-term care settings, yet reports indicate that a high proportion of antibiotic prescriptions are unnecessary. The adverse consequences of unnecessary antibiotic use include adverse drug reactions or interactions, the development of *Clostridium difficile* infections, the emergence of multi-drug resistant organisms, antibiotic failure, increased mortality, and greatly increased costs. The Centers for Disease Control and Prevention characterizes antibiotic resistance as "one of the world's most pressing public health threats." Unnecessary prescribing practices by clinicians and overuse of newer, broad-spectrum antibiotics when either no antibiotic or an older narrow-spectrum drug would suffice are believed to be the primary contributors to this problem. As a result of the above complexities, nursing homes are increasingly recognized as reservoirs of antibiotic-resistant bacteria.

To address these issues, [Name of nursing home] has developed an antimicrobial stewardship program that will [briefly describe goal of selected intervention]. Antimicrobial stewardship is the act of using antibiotics appropriately—that is, using them only when truly needed and using the right antibiotic for each infection. This program includes tools, policies, and procedures that aim to guide nursing home staff toward more responsible and effective use of antibiotics. To achieve our goal, [Name of nursing home] will be [briefly describe specific activities the home will undertake].

This effort, to be implemented beginning [DATE], is crucial to improving outcomes for our residents and the nursing home as a whole. Your participation will be essential.

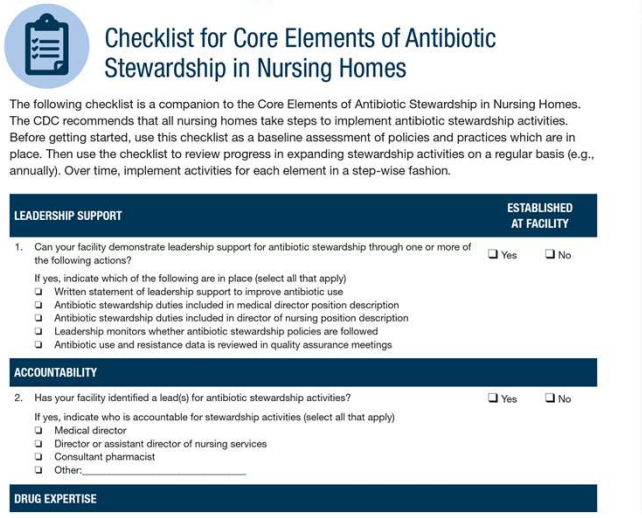
Assessing Nursing Home Stewardship



Checklist for Core Elements of Antibiotic Stewardship in Nursing Homes

The following checklist is a companion to the Core Elements of Antibiotic Stewardship in Nursing Homes. The CDC recommends that all nursing homes take steps to implement antibiotic stewardship activities. Before getting started, use this checklist as a baseline assessment of policies and practices which are in place. Then use the checklist to review progress in expanding stewardship activities on a regular basis (e.g., annually). Over time, implement activities for each element in a step-wise fashion.

LEADERSHIP SUPPORT	ESTABLISHED AT FACILITY
1. Can your facility demonstrate leadership support for antibiotic stewardship through one or more of the following actions?	❑ Yes ❑ No
If yes, indicate which of the following are in place (select all that apply) ❑ Written statement of leadership support to improve antibiotic use ❑ Antibiotic stewardship duties included in medical director position description ❑ Antibiotic stewardship duties included in director of nursing position description ❑ Leadership monitors whether antibiotic stewardship policies are followed ❑ Antibiotic use and resistance data is reviewed in quality assurance meetings	
ACCOUNTABILITY	
2. Has your facility identified a lead(s) for antibiotic stewardship activities?	❑ Yes ❑ No
If yes, indicate who is accountable for stewardship activities (select all that apply) ❑ Medical director ❑ Director or assistant director of nursing services ❑ Consultant pharmacist ❑ Other:_____	
DRUG EXPERTISE	

https://www.cdc.gov/antibiotic-use/core-elements/pdfs/core-elements-antibiotic-stewardship-checklist-508.pdf

Accountability

Identify physician, nursing and pharmacy leads responsible for promoting and overseeing antibiotic stewardship activities in your facility

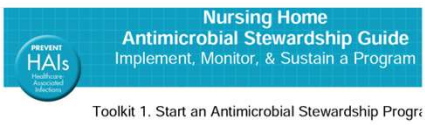
Key points:

- Empower the medical director
- Empower the director of nursing
- Engage the consultant pharmacist
- Partner with infection prevention program coordinator, referral lab, department of health

https://www.cdc.gov/antibiotic-use/core-elements/pdfs/core-elements-antibiotic-stewardship-H.pdf 17

17

Accountability Resources



Toolkit 1. Start an Antimicrobial Stewardship Progr

Tool 2. Roles and Responsibilities for Antimicrobial Stewardship

This table provides an example role and responsibility. Each nursing home should c
what the team needs to accomplish and how best to assign roles and responsibilities.

Name	Title	Roles, Responsibilities, and Tasks	Phone & Email
Example	*Assistant Director of Nursing*	*Co-champion and infection control lead.* *Co-develop agendas.* *Lead trainings.* *Monitor the new intervention.* *Draft policies and procedures; obtain necessary review and approval for new policies and procedures.* *Help develop staff training.* *Review whether materials are used.* *Develop findings related to monitoring the new intervention.*	*000-000-0000, name@organization.net*

3. **Appoint two champions to promote the importance of an antimicrobial stewardship program in the nursing home**. These individuals should lead the effort and be responsible for program outcomes. Two champions are recommended to increase the chance that the antimicrobial stewardship program always has a leader through periods of staff change. These champions should have the following qualities:

   a. A basic knowledge of antibiotics
   b. An interest in playing a leadership role in the nursing home
   c. The respect of his or her peers
   d. An understanding of how to be a good team player
   e. An understanding of the importance of improving antibiotic use in nursing homes

https://www.cdc.gov/antibiotic-use/core-elements/pdfs/core-elements-antibiotic-stewardship-H.pdf

Drug Expertise

Establish access to consultant pharmacists or other individuals with experience or training in antibiotic stewardship for your facility.

Priority areas:

- Work with consultant pharmacists
- Partner with local antibiotic stewardship program leads
- Develop relationships with infectious diseases consultants

Action

Implement at least one policy or practice to improve antibiotic use.

Priority examples (select):

- Policies that support optimal antibiotic use
- Broad interventions to improve antibiotic use
- Pharmacy-based interventions interventions to improve antibiotic use
- Infection and syndrome specific interventions to improve antibiotic use

Tracking & Reporting

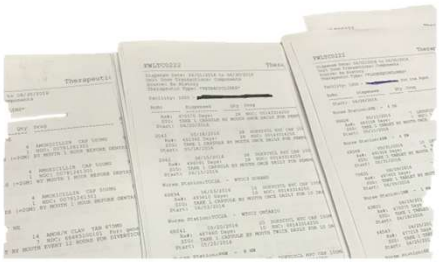
Monitor at least one process measure of antibiotic use and at least one outcome from antibiotic use at your facility.

Provide regular feedback on antibiotic use and resistance to prescribing clinicians, nursing staff and other relevant clinical staff.

Priority examples (select):

- Process measures: How and why antibiotics are prescribed
- Antibiotic use measures: How often and how antibiotics are prescribed
- Antibiotic use outcome measures: Tracking the adverse outcomes and costs from antibiotics

Measuring Antimicrobial Use



DRUG NAME	SIG			DATE WRITTEN	QTY AUTH	QTY DISP
DOXYCYCLINE 100 MG CAPSULE	TAKE ONE CAPSULE PO TWICE	DAILY X 7 DAYS	(BRONCHITIS/COPD)	27-Jan-16	14	14

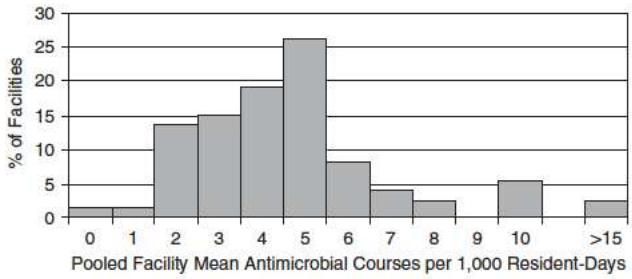
30

New Starts

Courses/starts per 1,000 resident days



- Advantages: easier to measure
- Disadvantages: does not tell the whole picture- what about durations and overall exposure
  - Remember- a single course of chronic UTI prophylaxis is only started once!!!

Benoit SR et al. *JAGS* 2008;56:2039-44.

dason DUKE ANTIMICROBIAL STEWARDSHIP OUTREACH NETWORK

31

Proportion of Residents Receiving Antibiotics

Number (or percentage) of patients receiving antimicrobials

Advantages:
This number can help target education.

Disadvantages:
This can still underestimate key prescribing practices.

Table 2. Comparison of antibiotic use and cost indicators by physician, February 1999-September 2001*

Physician code	Incidence	AUR	Cost/RCD	Cost/ Ab-day
A	3.7 ± 1.3	3.7 ± 1.6	$0.18 ± 0.11	$5.49 ± 2.50
B	4.9 ± 1.4	4.7 ± 1.3	$0.25 ± 0.12	$5.35 ± 1.83
C	4.6 ± 2.7	4.2 ± 2.2	$0.30 ± 0.20	$7.43 ± 4.52
D	6.5 ± 2.4	6.5 ± 2.5	$0.39 ± 0.19	$5.87 ± 1.72
E	5.5 ± 1.4	4.7 ± 1.3	$0.25 ± 0.12	$5.31 ± 1.74
F1	4.1 ± 2.1	3.3 ± 1.9	$0.19 ± 0.12	$6.01 ± 3.37
F2	6.1 ± 1.9	5.5 ± 2.1	$0.27 ± 0.17	$5.00 ± 1.93
P value	<.001	<.001	<.001	.08

RCD, Resident care-days; *Ab*, antibiotic; *AUR*, antimicrobial utilization ratio; *Cost/RCD* = Total cost for antibiotics per month/total resident care-days per month; *cost per A Day* = Total cost for antibiotics per month/total antibiotic-days per month; *Incidence* = Number of antibiotic courses started per 1000 resident care-days per month; *AUR* = Number of antibiotic days per month/number of resident care-days per month multiplied by 100 (%).
*Values are mean ± standard deviation per month for 33-month study period.

34

There is no substitute for chart review (in some cases)…

Measures of antibiotic use

Point prevalence of antibiotic use. Point prevalence surveys of antibiotic use track the proportion of residents receiving antibiotics during a given time period (i.e., a single-day, a week, or a month). Because the data collection is time-limited, point prevalence surveys are an easier way to capture antibiotic use data. In addition to providing a snap-shot of the burden of antibiotic use in a facility, point-prevalence surveys can capture specific information about the residents receiving antibiotics and indications for antibiotic therapy.[1] Unlike other antibiotic use measures which focus only on the prescriptions initiated in the nursing home, prevalence surveys could also include data on residents admitted to the facility already receiving an antibiotic to track the total burden of individuals at risk for complications from antibiotic use (e.g., *C. difficile* infection).

CDC. Core Elements of Antibiotic Stewardship in Nursing Homes- Appendix B 2015.

dason DUKE ANTIMICROBIAL STEWARDSHIP OUTREACH NETWORK

National Data

- Cohort of 309,884 US nursing homes residents from 1,664 nursing homes in 2016
  - 54% of residents received at least 1 systemic antibiotic

Antibiotic	Total Courses		Course Duration (Days)

Making the Data Actionable

Data alone will not answer all the questions, but is allows more refined reviews

- Who?- Who is writing for the antibiotics?
- What?- What is the most frequently used antibiotic?
- Where?- Are there units that tend to use the most antibiotics?
- When?- Are there times when antibiotics are most likely to be prescribed?
- Why? - What is the most common reason antibiotics are used?

From there

- Conversations become more productive
- Guidelines for use can be created with provider input
- Remember- always ask why- the reasons behind the use might not be what you had guessed!
