North Carolina SPICE
Statewide Program for Infection Control & Epidemiology

INFECTION PREVENTION CONSULTANT TEAM · NORTH CAROLINA

Free, practical mentorship for infection preventionists

A 12-month performance improvement project from NC DHHS and SPICE

MENTORSHIP AT A GLANCE

For IPs **in their role less than one year.** A more experienced infection preventionist provides individualized guidance, consultation, education, and feedback to help strengthen the facility's infection prevention and control (IPC) program.

Participation is voluntary; a facility may opt out at any time.

WHAT YOUR FACILITY GAINS

- ✓ Scheduled onsite education, consultation, and coaching with a SPICE Infection Preventionist (IP) consultant
- ✓ Comprehensive review of the current infection prevention program
- ✓ Support for IP knowledge, skills, and real-world challenges
- ✓ Practical strategies, resources, and staff education
- ✓ Visit summary, recommendations, time for questions, and next-visit planning

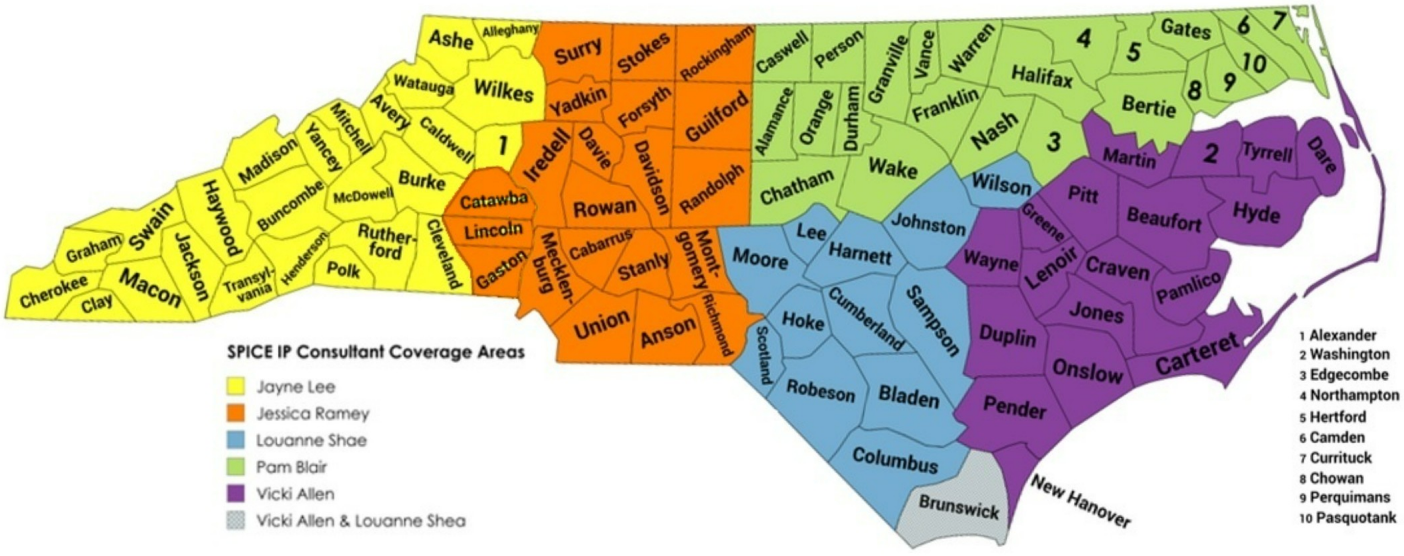

NC SPICE ALSO OFFERS

In addition to IP mentorship, services to help build your infection prevention program and keep your facility **survey ready.**

- **ICAR assessments**
- **Environmental rounding**
- **Infection prevention education**
- **Auditing help**
